Art Unit: 3743

DETAILED ACTION

Claim Objections

1. Claim 15 is objected to because of the following informalities: there appears to be a typographical error in line 1. It is assumed that "thee" is intended to be –the--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.
- 2. Claim 1 recites the limitation "the prevention" and "the controlled delivery" in lines 1 and 2. Claim 2 recites the limitation "the proliferation," "the vascular wall," and "the formation" in lines 3 and 4. Claim 4 recites the limitation "the same" in line 4. Claim 5 recites the limitation "the translation" and "the collagen formation" in line 3. Claim 7 recites the limitation "the same" in line 4. Claim 8 recites the limitation "the treatment" in line 4. Claim 9 recites the limitation "the proliferation" and "the vascular wall" in line 2. Claim 11 recites the limitation "the same" in line 3. Claim 12 recites the limitation "the translation" and "the collagen formation" in line 2. Claim 14 recites the limitation "the same" in line 3.

There is insufficient antecedent basis for these limitations in the claims.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 09/850,293

Art Unit: 3743

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Page 3

4. Claim s 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Morris et al. in US Patent No. 5,516,781.

Morris et al. disclose a method for the prevention of constrictive remodeling via controlled delivery, by release from an intraluminal medical device, a compound in the rapeutic dosage amounts, as recited in claims 1-5; utilizing a compound to block the proliferation of fibroblasts in the vascular wall in response to injury. thereby reducing the formation of vascular scar tissue, as recited in column 4. lines 1-32; a compound has rapamycin, as recited in column 3, lines 45-50; and a compound that has analogs and congeners that bind a high-affinity cytosolic protein, FKBP12, and possesses the same pharmacologic properties as rapamycin. Since the current disclosure on page 9 recites, "Rapamycin as used throughout this application shall include rapamycin, rapamycin analogs, derivatives and congeners that bind FKBP12 and posses the same pharmacologic properties as rapamycin," the use of rapamycin is all encompassing. Morris et al. also disclose a compound to affect the translation of certain proteins involved in the collagen formation or metabolism; a drug delivery device having an intraluminal medical device; a therapeutic dosage of an agent releasably affixed to the intraluminal medical device for the treatment of constrictive vascular remodeling; and an intraluminal medical device that is a stent, as recited in claim 1.

Double Patenting

5. Claims 1-15 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of copending Application No. 09/850,233. Although the conflicting claims are not identical, they are not patentably distinct from each other because the current application is merely a different wording representation. In some aspects the claims of the current application may be broader in some respects and add features in other aspects.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

6. Claims 1-15 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of copending Application No. 09/850,507. Although the conflicting claims are not identical, they are not patentably distinct from each other because the current application is merely a different wording representation. In some aspects the claims of the current application may be broader in some respects and add features in other aspects.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

7. Claims 1-15 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of copending Application No. 09/850,232. Although the conflicting claims are not identical, they are not patentably distinct from each other because the current application is

Page 5

Application/Control Number: 09/850,293

Art Unit: 3743

merely a different wording representation. In some aspects the claims of the current application may be broader in some respects and add features in other aspects.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

8. Claims 1-15 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim1-14 of copending Application No. 09/850,365. Although the conflicting claims are not identical, they are not patentably distinct from each other because the current application is merely a different wording representation. In some aspects the claims of the current application may be broader in some respects and add features in other aspects.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

9. Claims 1-15 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of copending Application No. 09/575,480. Although the conflicting claims are not identical, they are not patentably distinct from each other because merely a broader representation.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure are as follows: US Patent No. 5,519,042; US Patent No.

Application/Control Number: 09/850,293

Art Unit: 3743

6,369,039; US Patent No. 5,569,462; US Patent No. 5,283,257; US Patent No. 5,288,711; US Patent No. 5,665,728; US 2002/0095114; US 2002/0082685; US 2002/0061326; US 2002/0010418; US 2002/0133224; US 2002/0133222; US 2002/0127327; US 2002/0123505; US 2002/0119178; US 2002/0203526; US 2002/0099438; and US 2002/0082680.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kathryn Ferko whose telephone number is (703) 306-3454. The examiner can normally be reached on M-F (7:30-5:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry A Bennett can be reached on (703) 308-0101. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9302 for regular communications and (703) 872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1113.
